

# HUBERT MAZUR

SOFTWARE ENGINEER | FULL STACK | JAVA & ANGULAR

mazurhubert.praca@gmail.com | +31 645059919 | Amsterdam | [LinkedIn](#) | [GitHub](#)

## ABOUT ME

I am a 25-year-old software engineer with a Computer Science degree from the Warsaw University of Technology and **3.5 years of experience** building scalable backend services in Java and Python. Pursuing a Master's in Software Engineering at UvA, I bring hands-on expertise in Spring Framework, relational databases, Kubernetes, and CI/CD — thriving in cross-functional teams on challenges that impact large user bases. In my free time, I enjoy bouldering, strategic board games, and puzzle video games.

## WORK EXPERIENCE

### FULL-STACK SOFTWARE ENGINEER

at CUURIOS

Nov. 2024 – Present. **1.5 years**

Tech Stack: Spring Boot 3, MS SQL, Angular 20, AWS

- Engineered a **Java** Structure of Arrays data model for the Multi-Skill Resource-Constrained Project Scheduling Problem solver, achieving **12× performance gains** by minimising heap allocations on the hot path and enabling faster delivery of resource planning solutions.
- Enabled flexible real-time data processing workflows by rapidly learning **Angular** and developing **full-stack** features, including designing a TOML-based pipeline configuration module that reduced setup time and increased platform adaptability.
- Reduced technical support response times and automated training data generation by architecting AI/ML solutions in **Python** with **GCloud Vertex AI Gemini** and building a LangChain-inspired query execution tool.
- Improved system **scalability** and **client delivery** by leading infrastructure modernisation efforts, including legacy migration, refactoring pipelines for **Kubernetes** distributed execution, and collaborating with clients on GCloud deployment and integration testing.

### SPRING BOOT WEB DEVELOPER

at ENIGMA INFORMATION SECURITY SYSTEMS

April 2023 – Sep. 2024. **1.5 years**

- Developed and maintained internal services for managing mass clients, partners, and order processing for digital signatures (**PKI**) using **Spring Frameworks**, providing **RESTful APIs** fully documented in **Swagger**.
- Used **Hibernate** and **Querydsl** for creating efficient data models.
- Managed development and testing environments using **Docker Swarm** and **TeamCity** platform.

### JAVA INTERN

at GRID DYNAMICS

Aug. 2022 – Feb. 2023. **0.5 years**

- Developed and maintained **Spring Boot** applications, enhancing functionality and performance.
- Utilized **SQL (PostgreSQL)** for database management and data manipulation tasks.
- Collaborated with a corporate development team to deliver software solutions in a large-scale **agile** environment.

## PROJECTS

### GAME ROOM MANAGEMENT PLATFORM (GRMP)

Java 25, Spring Boot 4, WebSocket/STOMP, PostgreSQL, Redis, Docker  
React 18, TypeScript, Vite, Tailwind CSS, nginx, JWT, Testcontainers

- Architected an **extensible game plugin system**: games deploy at runtime without platform rebuilds; frontend games run as sandboxed iframes communicating via a custom **TypeScript SDK** and postMessage protocol.
- Built a **distributed microservices backend** (REST auth + stateful WebSocket game host) with **JWT**-secured inter-service communication and a **React/TypeScript** SPA for real-time lobby and gameplay.
- Containerised the full stack with **Docker Compose** (nginx, PostgreSQL, Redis) and an automated deployment pipeline covering backend and frontend builds end-to-end.
- Delivered **Seven Wonders: Duel** as an end-to-end PoC plugin, validating the platform's ability to host complex, stateful turn-based games with rich game-specific logic.

## EDUCATION

### MASTER'S IN SOFTWARE ENGINEERING

at UNIVERSITY OF AMSTERDAM

Sep. 2024 – **Present (thesis writing)**

### BACHELOR OF COMPUTER SCIENCE

at WARSAW UNIVERSITY OF TECHNOLOGY

**Summa Cum Laude**

Oct. 2020 – Feb. 2024

## CERTIFICATES

- CAE **C2 English** Certificate – British Council
- AZ-900 **Azure** Fundamentals – Microsoft
- Lakehouse Fundamentals – Databricks

## SKILLS

### Programming Lang. & Frameworks & Technologies

- BE: **Java** & **Spring** Framework, Python, Microservices, nginx
- FE: **Angular**, React, TS, HTML, CSS
- DB: PostgreSQL, MS SQL, MongoDB, Redis
- Basic proficiency: C++, Haskell, Rust

### CI/CD & Cloud

- Git, Jenkins, GitLab CI, GitHub Actions
- Cloud Services (Azure, AWS, GCloud)
- Containerisation & Orchestration: Docker, Kubernetes

## LANGUAGES

- English – C2
- Spanish – A2
- Polish – native
- Willingness to learn Dutch

I'D LOVE TO BE PART OF YOUR TEAM!
